

PFAS - Declaration

Per- and polyfluoroalkyl substances (PFAS) are a large group of synthetic chemicals that are persistent in the environment and may pose risks to human health and ecosystems.

We, Baitella AG, manufacturer of articulated arms with central locking knob and holders for medical and industrial applications, declare based on current knowledge and the information provided by our suppliers, the products manufactured by our company do NOT contain intentionally added PFAS substances and are not expected to release PFAS under normal or reasonably foreseeable conditions of use.

This statement reflects the status of our knowledge as of the date of issuance. Baitella AG makes no warranties, express or implied, and assumes no liability regarding the accuracy or completeness of supplier-provided data or potential trace impurities that are not intentionally introduced or reasonably detectable.

This declaration is made in response to increasing regulatory attention to PFAS substances worldwide, including evolving requirements in the European Union, the United States, and other jurisdictions.

Should future legal or scientific developments require adjustments, Baitella AG will update this declaration accordingly.
